easy to use

What aspects of this system did you like least?

N/A

Were there any features you were surprised to see?

NO

What features did you expect to encounter but did not see? That is, is there anything that is missing in this application?

N/A

Compare this system to other systems you have used.

Other systems I have used are better

Would you recommend this system to your colleagues?

It is only one we use, other systems elsewhere are better

Questions for After the Exercises

What was your overall impression of this system?

Registering Patients was the most difficult part of the scenario. Ordering Labs/Xrays + Supplies causes for

What aspects of this system did you like most?

Ordering Labs & Xrays.

What aspects of this system did you like least?

Registering Patients

Were there any features you were surprised to see?

I was very surprised at the amount of time it took me to register a patient. I'd like to get my times down to less than 5 mins moving forward

What features did you expect to encounter but did not see? That is, is there anything that is missing in this application?

I wanted to experience ordering + signing off meds as a nurse to better understand their duties.

Compare this system to other systems you have used.

Pretty easy to use prompts are a good addition.

Would you recommend this system to your colleagues?

I would recommend taking the time to review each page in depth to verify all options + selections.

**Questions for After the Exercises**

What was your overall impression of this system?

It was ok

What aspects of this system did you like most?

The accessibility to update or make changes

What aspects of this system did you like least?

The lack of electronic compatibility with using the mouse. Having to completely go back to change something just to edit a single letter.

Were there any features you were surprised to see?

no

What features did you expect to encounter but did not see? That is, is there anything that is missing in this application?

Ability to toggle between pages to edit freely without having to completely remove yourself from the chart first.

Compare this system to other systems you have used.

This system is a little outdated. This system does not allow the use of the mouse. The system does not have a spell check feature which causes a lot of errors when not knowing how to spell certain things.

Would you recommend this system to your colleagues?

No.

Questions for After the Exercises

What was your overall impression of this system? - ~~Difficult~~ <sup>Not visually intuitive and difficult on eyes</sup>

In some respects task that are performed daily are straight forward. If it is an area you don't normally use - it is more difficult to navigate

What aspects of this system did you like most?

Gets the job done

What aspects of this system did you like least?

Footers at bottom of screen are difficult to decipher if you are not familiar

Were there any features you were surprised to see?

No

What features did you expect to encounter but did not see? That is, is there anything that is missing in this application? None

Compare this system to other systems you have used.

Archaic. Lacks Word Processing capabilities that would make documentation easier.

Would you recommend this system to your colleagues?

No.

Questions for After the Exercises

What was your overall impression of this system?

Having used the system extensively, I am very familiar with the majority of the functions. Overall, the system seems dated and some of the processes more complicated than needed. It is not very user friendly.

What aspects of this system did you like most?

The protocol system has a lot of useful information for the providers. The patient history section is easy to access. Ordering labs/x-rays was simple.

What aspects of this system did you like least?

Registration process was complicated. It was not easy to add to problem list (actual diagnoses).

Were there any features you were surprised to see?

No.

What features did you expect to encounter but did not see? That is, is there anything that is missing in this application?

I expected to see information from outside providers - diagnoses, meds, etc. This may be due to testing on the training system.

Compare this system to other systems you have used.

I have not used other systems.

Would you recommend this system to your colleagues?

There is a decent learning curve, but once you get the hang of it, most processes are relatively easy.

Questions for After the Exercises

What was your overall impression of this system?

Over all the registration process was simple.

I was not able to

What aspects of this system did you like most?

Ordering LabS & Rx

What aspects of this system did you like least?

~~the~~ entering medS & Allergies

Were there any features you were surprised to see?

How to order medS & Rx

What features did you expect to encounter but did not see? That is, is there anything that is missing in this application?

Compare this system to other systems you have used.

PAS can be user friendly with  
Prompts

Would you recommend this system to your colleagues?

NO

Questions for After the Exercises

What was your overall impression of this system?

Have to be familiar with the system to navigate the system. Have to take time to read and follow prompts

What aspects of this system did you like most? system is not user friendly.

What aspects of this system did you like least?

Instructions are not clear. Have to have accurate precise training to understand system.

Were there any features you were surprised to see?

No

What features did you expect to encounter but did not see? That is, is there anything that is missing in this application? missing the ability to catch/correct typos efficiently  
Our PAS system has great features and is inclusive <sup>missing a "Snapshot" of a patient history/problems</sup>  
if you have a good background and understanding on how to access the multiple levels available.

Compare this system to other systems you have used.

It is a learned system not new user friendly. you have to retain the "shortcuts" to get to

what you are looking for. Hard to get a quick accurate picture of

No

the patient.

**Questions for After the Exercises**

What was your overall impression of this system?

I found it easy to follow. The key is you have to read very carefully to determine the next step

What aspects of this system did you like most?

It is basic and it has a number of system checks in place to make sure you are making the right decisions

What aspects of this system did you like least?

At times there is a lot of information to digest on the screen and some steps seem repetitive.

Were there any features you were surprised to see?

No

What features did you expect to encounter but did not see? That is, is there anything that is missing in this application? I think it was pretty encompassing and user friendly

Compare this system to other systems you have used.

A little wordy, key strokes instead of clicks. Not necessarily a bad thing. Just obvious difference

Would you recommend this system to your colleagues?

I would
